Reverse

the way people used to plan a trip.

Original

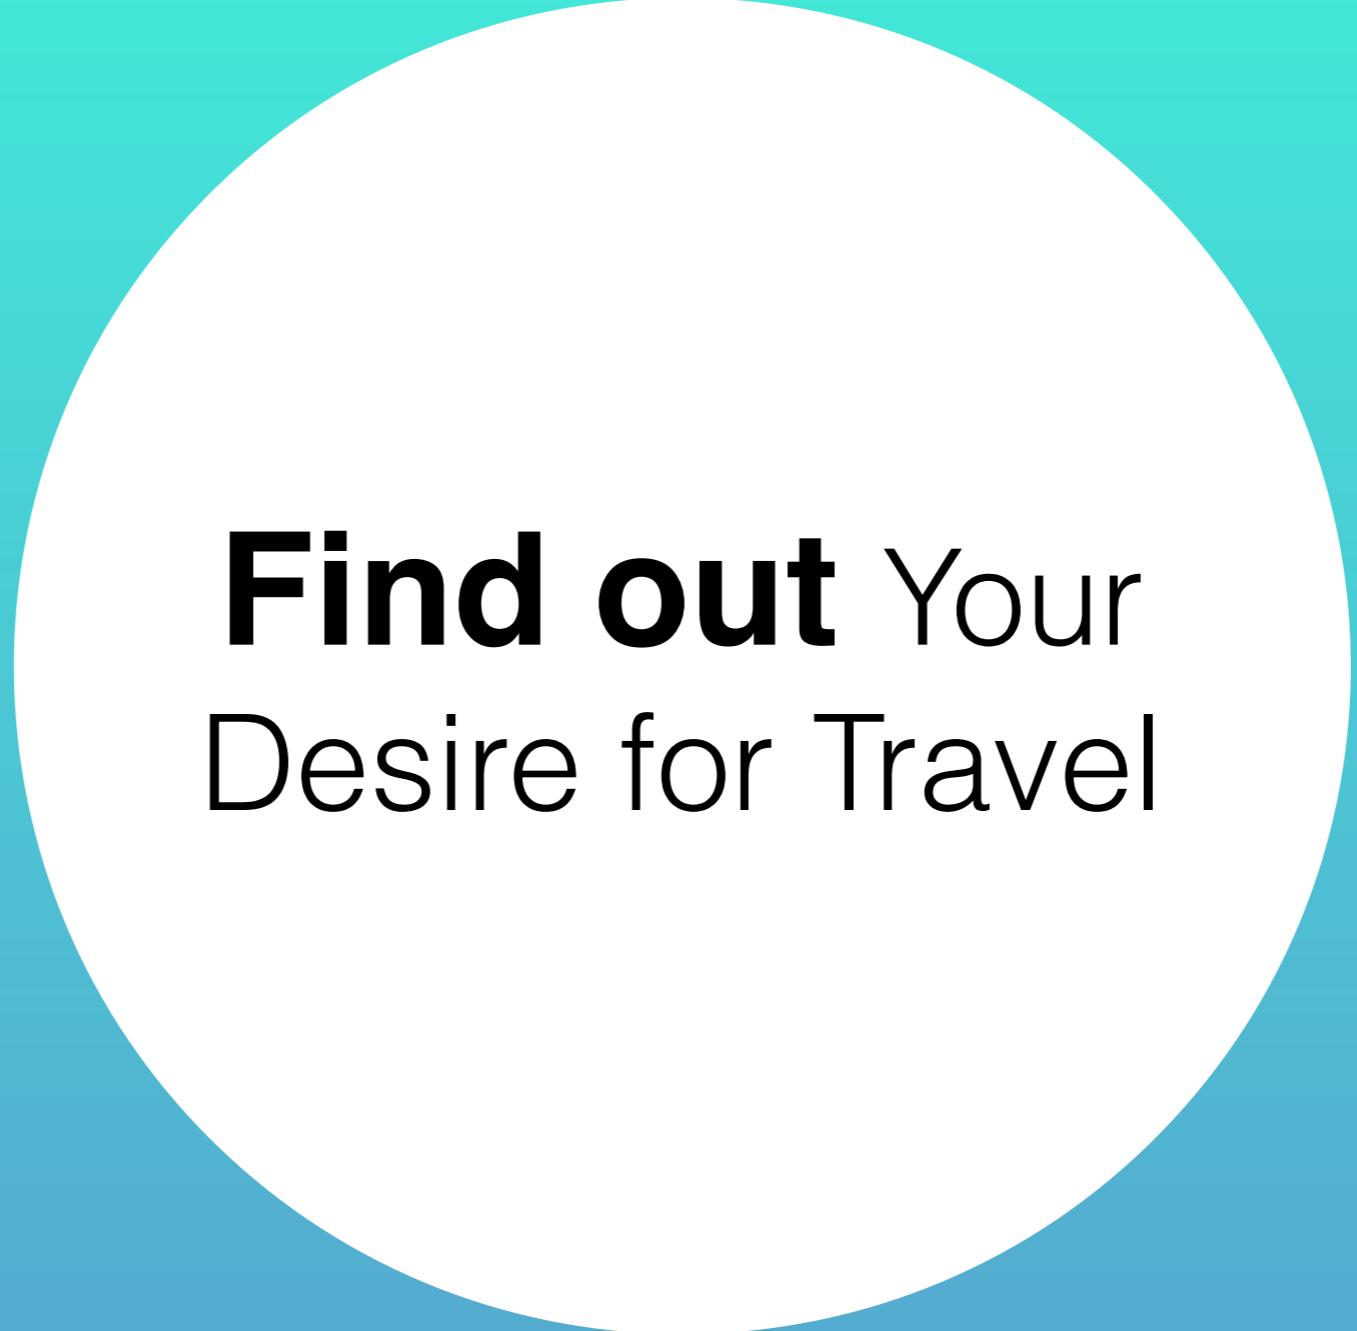

Our Idea

Look for travel spots on a
trip planner website

Analyze your habits to
recommend accurately

Find out Your
Desire for Travel

Social Media User

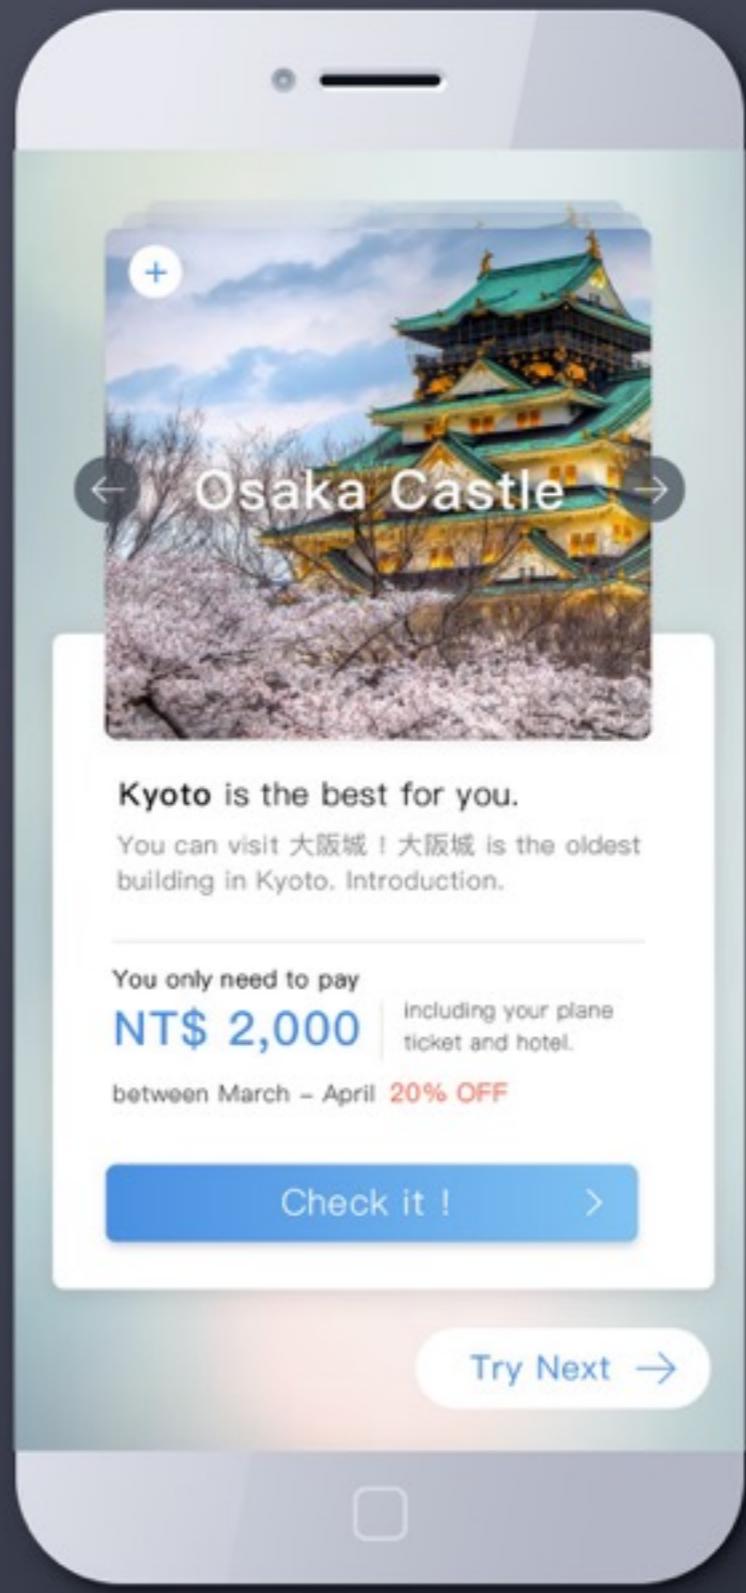

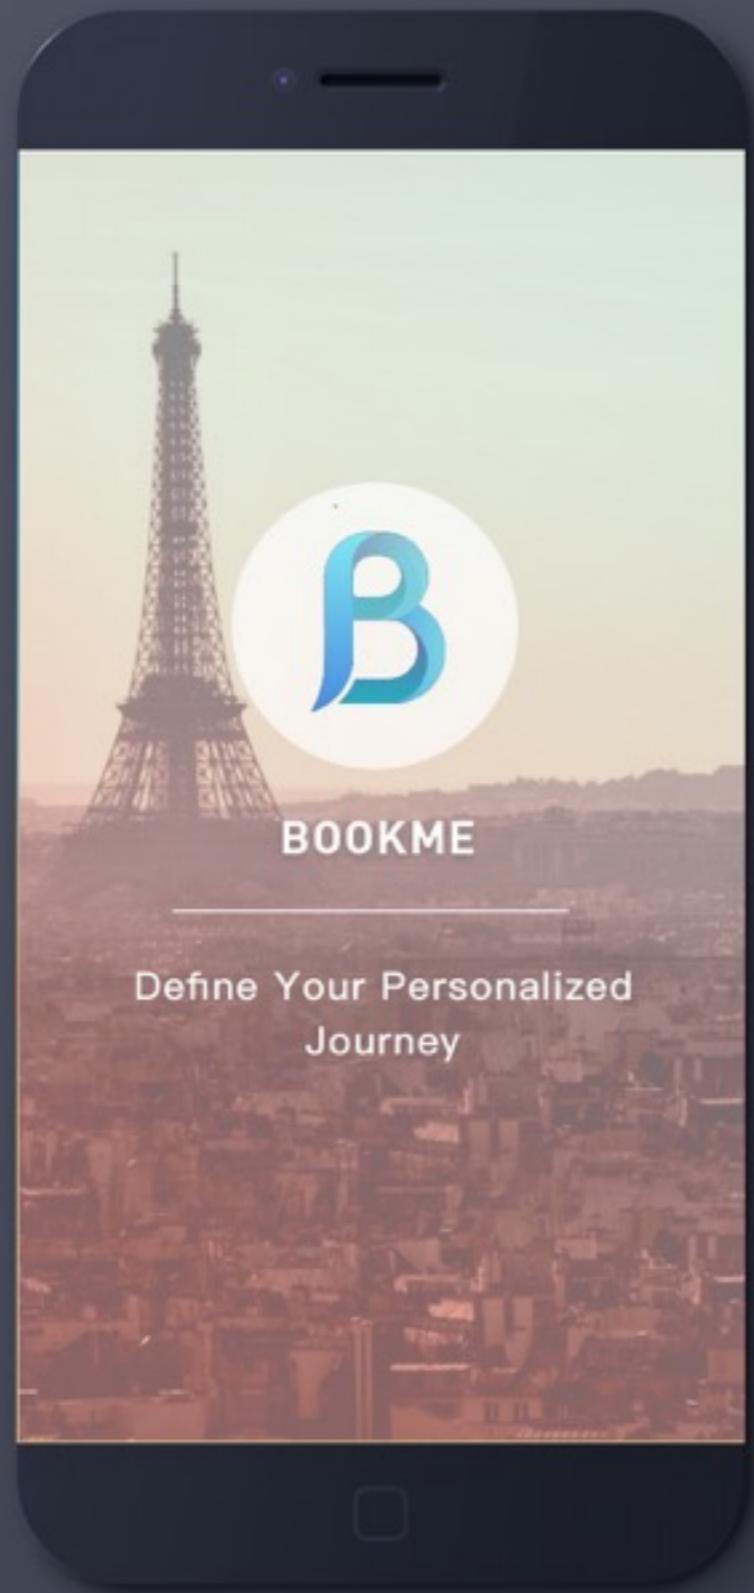

Follow friends' social media

Busy People

Do not have time to plan trips

Target Users

Features Highlight

Personalized Analysis

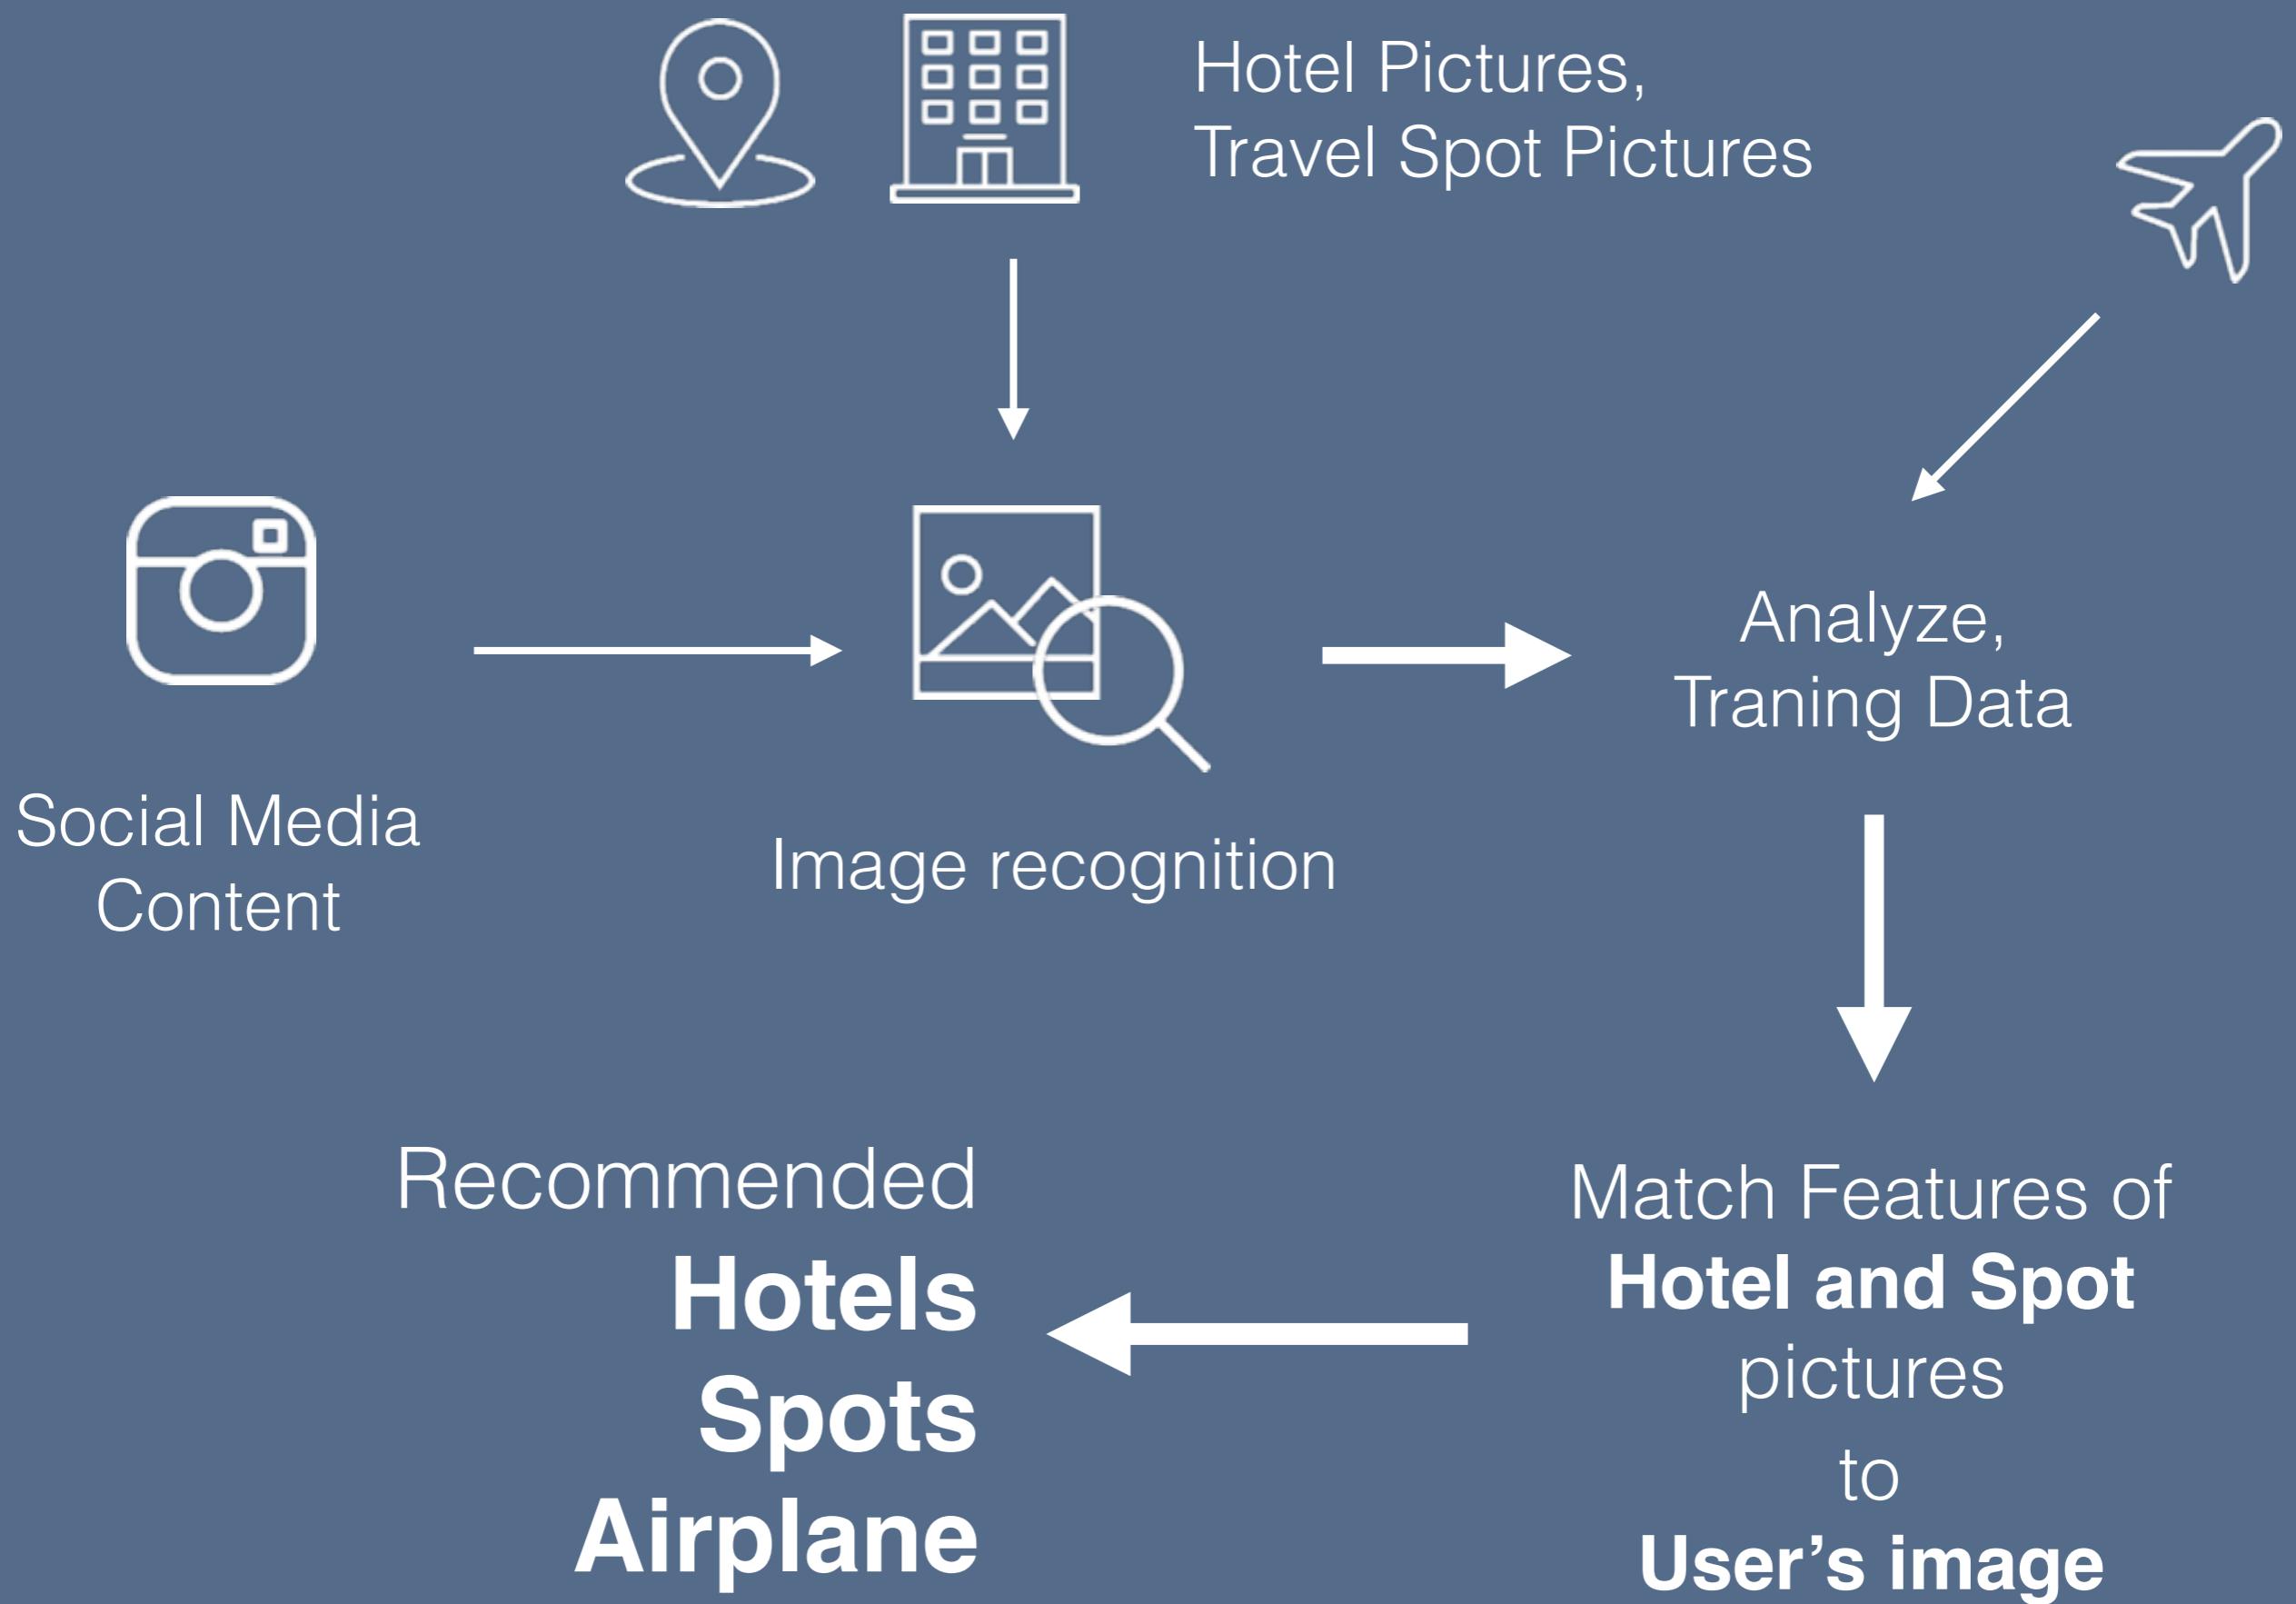

Import your social media such as Instagram or upload image to find out the most suitable hotels.

Image & Data Analysis

Our application can analyze your uploaded data and images, and also hotels. Then we match users' preference to the hotel.

Automatic Price Comparison

You can get the highest quality within budget

24 HR

We have trained ...

Hotels : 20,000

LandMark : 100,000
